**Galaktika Records** introduces its first compilation.

For the first time a single release gathers on two CDs the best tracks from the past, and the material that will draw the future of the label: the first one, mixed by **Maurice Aymard**, with deep house oriented recent tracks; the second one, by **Pablo Bolivar** browses of the milestones of the catalogue of the label in a more techno way.

In a single release it combines emblematic tracks in charge of **Garnica**, **Sian** or **Iñiqui Marin**, to name a few; and the more recent **Galaktika Records'** values: **Patrick Zigon**, **Paulo Olarte** or **Gui Boratto**. Interesting samples to taste the fascinating sound of this label.

Full of rhythm and style, a double feature to dive into the **Galaktika Record's** world, actually a paradigm of the catalonian electronic music.
